https://drive.google.com/open?id=0B-ob6L_QjGLpZHLiX0IUeE1Cems NEW QUESTION 550An EIGRP routing table shows four paths to a destination each with a different metric, which feature can you implement to load balance traffic across all four paths? A. Feasible distanceB. VarianceC. LoadD. Administrative distance Answer: B NEW QUESTION 551Which two statements about traffic shaping are true? (Choose two.) A. Packets that exceed the configured threshold are dropped.B. Packets that exceed the configured threshold are remarked and sent.C. Packets that exceed the configured threshold are held in a buffer.D. It can be applied in the outbound direction only.E. It can be applied in the inbound and outbound directions. Answer: CE NEW QUESTION 552Which two statements about a point-to-point wan topology are true? (Choose two.) A. It uses a single router to route traffic between sites.B. It provides redundancy between the central office and branch offices.C. It is usually established over a dedicated connection.D. It provides direct connections between each router in the topology.E. It connects remote network through a single line. Answer: DE NEW QUESTION 553Which two QoS requirements are applied to interactive video traffic according to industry best practice? (Choose two.) A. Jitter less than 30 msB. One way delay less than 400 msC. Marking with mpls exp bitsD. FIFOE. Packet loss less than 1 Answer: AE NEW QUESTION 554When troubleshooting an issue with an SVI, which three areas do you check? (Choose three.) A. RoutingB. GatewayC. EncapsulationD. Frame sizeE. InterfaceF. Asic Answer: ACE NEW QUESTION 555What is the primary function of the southbound API? A. To communicate between network applications and switches and routes on the network.B. To communicate between the sdn controller and switches and routers on the network.C. To communicate between the sdn controller and services and applications on the network.D. To communicate between the sdn controller and pcs on the network. Answer: C NEW QUESTION 556For which type of connection is broadband PPPoE most appropriate? A. DSLB. GRE TunnelC. SatelliteD. PPTP Answer: A NEW QUESTION 557Under which two scenarios does a port with BPDU guard enabled transition to the Err-disabled state? (Choose two.) A. When the port is a trunk port on a switch and it is connected to a trunk port on another switch.B. When the port is portfast enabled access port on a switch, and it is connected to an access port on another switch.C. When the port is an access port on a switch and it is connected to a PC.D. When the port is an access port on a switch and it is connected to a Hub.E. When the port is on a pc and its connected to a server. Answer: E NEW QUESTION 558Which three checks must you perform when troubleshooting eigrpv6 adjacencies? (Choose three.) A. Verify that IPv6 is enabled.B. Verify that the interface is up.C. Verify that an IPv4 address has been configured.D. Verify that auto summary is enabled.E. Verify that the router ID has been configured.F. Verify that the network command has been configured. Answer: ABE NEW QUESTION 559Which two tasks use OSPFv4 hello packets? (Choose two.) A. Requesting topology changes.B. Beginning neighbor discovery.C. Acknowledging message receipt.D. Sharing link state database.E. Performing DR election. Answer: BC NEW QUESTION 560Which type of data is transmitted between switches to elect the root bridge? A. BPDUsB. PacketsC. HellosD. Segments Answer: A NEW QUESTION 561Which information can the APIC-EM ACL path trace feature provide? A. All ACLs and aces along a path, regardless of a match.B. Only matching ACL names along a path.C. Matching aces only in the ACLs along a path.D. All ACEs in matching ACLs along a path. Answer: D NEW QUESTION 562Which two characteristics of standard access list are true? (Choose two.) A. They can compare source and destination traffic against a permit or deny statement.B. They can be identified only with a number between 1 and 99.C. They must be identified with a number between 1 and 99 or 1300 and 1999.D. They cannot be used to identify traffic path.E. They can compare source traffic only against a permit or deny statement. Answer: CE NEW QUESTION 563Which purpose of the network command in the BGP configuration of a router is true? A. It advertises a valid network as local to the autonomous system of a router.B. It enables route advertisement in the BGP routing process on the router.C. It advertises any route in BGP with no additional configuration.D. It indicates whether a neighbor supports route refresh. Answer: B NEW QUESTION 564What is the effect of the switch port voice vlan 20 command? A. It assigns the interface to a voice vlan.B. It configures the interface as an access port.C. It displays the voice vlan configuration of the interface.D. It configures priority tagging for voice traffic on vlan 20. Answer: D NEW QUESTION 565On which port type is the spanning-tree port fast command supported without additional configuration? A. Layer 3 main interfacesB. Layer 3 subinterfacesC. Access portsD. Trunk ports Answer: D NEW

QUESTION 566 Which result occurs when you configure the switchport mode dynamic auto command on the switch port at both ends of a trunk link? A. Either switch port can initiate the trunk. B. The trunk forms immediately because both switch ports are configured for permanent trunking mode. C. The trunk fails to form because both switch ports fail to initiate trunking. D. Both switch ports actively form the trunk. Answer: A

NEW QUESTION 567 Which two numbers are valid extended VLAN numbers? (Choose two.) A. 1002 B. 1010 C. 4000 D. 4104 E. 5001 Answer: BC

NEW QUESTION 568 After you configure a new router to connect to a host through the gi0/0 port of the router, you log in to the router and observe that the new link is down, which action corrects the problem? A. Use a straight through cable between the host and R1. B. Use a roll over cable between the host and R1. C. Use a crossover cable between the host and R1. D. Configure the host to use R1 as the default gateway. Answer: A

NEW QUESTION 569 While troubleshooting the failure of an OSPFv3 Ethernet connection between router R1 and R2, you determine that the hello timer are mismatched and that R2 is configured with default settings, which command do you enter on R1 to correct the problem? A. R1(config-if)#ip ospf hello-interval 10 B. R1(config-if)#ip ospf hello-interval 20 C. R1(config-if)#ipv6 ospf hello-interval 20 D. R1(config-if)#no ipv6 ospf hello-interval Answer: B
