

[Pass Ensure VCE Dumps Premium PassLeader 70-646 283q Exam Questions with VCE Test Software For Free Download (171-200)]

Where Download The 100% Valid 70-646 Exam Dumps? PassLeader now is offering the newest and valid 283q 70-646 exam questions for preparing 70-646 exam, we ensure our new version 283q 70-646 pdf dumps and vce dumps are 100% valid for passing 70-646 exam, because PassLeader 70-646 PDF dumps and VCE dumps have been updated with the newest 70-646 questions and the 70-646 dumps have been corrected with right questions and answers. Now visit passleader.com to get the newest 283q 70-646 practice tests with free VCE Player! keywords: 70-646 exam, 283q 70-646 exam dumps, 283q 70-646 exam questions, 70-646 pdf dumps, 70-646 vce dumps, 70-646 practice test, 70-646 study guide, Pro: Windows Server 2008, Server Administrator Exam

Testlet: Litware, Inc QUESTION 171 You need to recommend a solution for managing all of the servers. The solution must meet the company's technical requirements. What should you include in the recommendation? A. Remote Server Administration Tools (RSAT) B. the Administration Tools Pack (adminpak.msi) C. the Remote Desktop Gateway (RD Gateway) role service D. the Remote Desktop Web Access (RD Web Access) role service Answer: A Testlet: Litware, Inc QUESTION 172 You need to recommend an IP addressing strategy for the client computers in the new sales office. What should you recommend implementing in the new sales office? A. DHCP server roles B. the DirectAccess feature C. the Network Policy Server (NPS) role service D. the Remote Access Service role service Answer: D Testlet: Litware, Inc QUESTION 173 You need to recommend a process for monitoring the servers. The process must meet the company's technical requirements. What should you include in the recommendation? A. event subscriptions B. Data Collector Sets (DCSs) C. Resource Monitor D. Microsoft System Center Operations Manager Answer: A Testlet: Litware, Inc QUESTION 174 You need to recommend a strategy for managing Windows Firewall that meets the company's technical requirements. What should you include in the recommendation? A. domain-based Group Policy objects (GPOs) B. local Group Policy objects (GPOs) C. Starter Group Policy objects (GPOs) D. System Starter Group Policy objects (GPOs) Answer: A Testlet: A. Datum A Datum1 (exhibit):

A. Datum
Scenario
COMPANY OVERVIEW
A. Datum Corporation is a manufacturing company that has a main office and two branch offices. The main office is located in New York and the branch offices are located in New York and Montreal. The main office has 10,000 users. Each branch office has approximately 200 users.
PLANNED CHANGES
A. Datum plans to deploy a new intranet site named Site1 in the main office. Two servers that run a Server Core installation of Windows Server 2008 R2 are requisitioned for the deployment of Site1.
You plan to deploy a domain controller in each office.
You have a new server named Backup1. All servers will be backed up remotely by using Windows Server Backup on Backup1.
BUSINESS GOALS
A. Datum has the following business goals:
- Changes to the environment must minimize costs.
- Changes to the environment must optimize the use of new hardware.
- The costs to manage the network infrastructure and the servers must be minimized.
EXISTING ENVIRONMENT
All servers run Windows Server 2008 R2. All client computers run Windows 7 Enterprise.
The network contains a Web server named Web1. Web1 is located in the perimeter network and is accessible from the internal network and the Internet. Web1 runs a Server Core installation of Windows Server 2008 R2 Standard Edition.
Existing Active Directory/Directory Services
The network contains a single Active Directory domain named adatum.com.
The main office has two domain controllers.
Existing Network Infrastructure
Each office has a file server.
The main office connects to each branch office by using a WAN link. Users in the branch offices frequently access the file server in the main office.
Current Administration Model
All domain administrators work in the main office and remotely manage the servers by using their Windows 7 computers.
A group named Branch Admins has the rights to manage all of the client computers in the branch offices.
You have several ADMX files that contain custom application settings.

www.passleader.com

ADatum2 (exhibit):

REQUIREMENTS

www.passleader.com

Security Requirements

The BranchAdmins group members must be able to install updates and drivers on the domain controllers in the branch offices.

Passwords must not be stored by using reversible encryption.

All authentication traffic on the network must be encrypted.

Application Requirements

A new application named WebApp2 must be deployed on Web1. The WebApp2 deployment must meet the following requirements:

- Users must be authenticated to access WebApp2.
- WebApp2 must support Web browsers from various vendors.
- WebApp2 must be accessible to internal users and Internet users.
- A failure of WebApp2 must not cause other Web applications to fail.
- Internet users must be required to configure the minimum number of changes on their client computers to access WebApp2.

Site1 must be configured to meet the following requirements:

- Site1 must support the most user connections possible.
- Site1 must be backed up every day by a remote server.
- If a single Web server fails, users must be able to access Site1.
- If a single Web server fails, users must not receive an error message when they access Site1.

Technical Requirements

You must ensure that domain administrators can access the ADMX files from any client computer that they use to manage Group Policies.

You must ensure that the domain administrators are notified by e-mail each time a user copies video files to the file servers.

QUESTION 175 You need to recommend a solution for Group Policy that meets the company's technical requirements. What should you recommend? A. Create a Central Store. B. Enable folder redirection. C. Modify the File Replication Service (FRS) settings for SYSVOL. D. Configure SYSVOL to use Distributed File System (DFS) Replication. Answer: A Testlet: A. Datum QUESTION 176 You need to recommend a strategy for the file servers that meets the company's technical requirements. What should you recommend? A. Implement active file screens. B. Implement passive file screens. C. Configure classification rules. D. Configure File Server Resource Manager (FSRM) quotas. Answer: B Testlet: A. Datum QUESTION 177 You need to recommend an availability solution for Site1 that meets the company's application requirements and business goals. What should you include in the recommendation? A. hardware load balancing B. Network Load Balancing (NLB) C. round robin DNS D. Windows Failover Clustering Answer: B Testlet: A. Datum QUESTION 178 You need to recommend changes to Web1 that meet the company's application requirements for the WebApp2 deployment. What should you recommend? A. Add a second IP address. B. Configure request filtering. C. Create separate application pools. D. Add worker processes to the DefaultAppPool. Answer: C Testlet: A. Datum QUESTION 179 You need to recommend a strategy for managing the domain controllers in the branch offices that meets the company security requirements. What should you include in the recommendation? A. Configure Administration Role Separation. B. Add the BranchAdmins group to the Domains Admins group. C. Add the BranchAdmins group to the Server Operators group. D. Assign the permission for the domain controller computer objects to the BranchAdmins group. Answer: B Testlet: A. Datum QUESTION 180 You need to recommend a security strategy for WebApp2 that meets the company's application requirements. What should you include in the recommendation? A. Basic authentication and SSL B. Digest authentication and SSL C. Digest authentication and SSL VPND. Basic authentication and SSL VPN Answer: A

<http://www.passleader.com/70-646.html> Testlet: A. Datum QUESTION 181 You need to recommend changes to Web1 to ensure that server backups can be performed remotely from Backup1. Which two changes should you include in the recommendation? (Each correct answer presents part of the solution. Choose two.) A. Install Windows PowerShell. B. Install Windows Server Backup. C. Modify the Windows Firewall settings. D. Enable the IIS Management Service feature. Answer: BC Testlet: A. Datum QUESTION 182 You need to recommend a security strategy for WebApp2 that meets the company's application requirements. What should you include in the recommendation? A. Basic authentication and connection security rules B. Basic authentication and SSL C. Digest authentication and connection security rules D. Digest authentication and SSL Answer: B Testlet: Nothwind Traders

Nothwind Traders

www.passleader.com

Scenario

COMPANY OVERVIEW

Nothwind Traders is an import/export company that has a main office and two branch offices. The main office is located in Toronto. The branch offices are located in Vancouver and Seattle. The main office has 2,000 users. Each branch office has 500 users.

EXISTING ENVIRONMENT

All client computers run Windows 7 Enterprise. All servers run Windows Server 2008 R2. All new servers are deployed by using Windows Deployment Services (WDS).

Nothwind Traders has multiple Hyper-V servers. The Hyper-V servers are managed by using Microsoft System Center Virtual Machine Manager (VMM).

The perimeter network contains a standalone server. The server has the Active Directory Lightweight Directory Service (AD LDS) service role installed. AD LDS is administered on the server by using the Active Directory module for Windows PowerShell.

All virtual machines (VMs) access iSCSI-based storage by using a Microsoft iSCSI Initiator installed on the VM.

Existing Active Directory/Directory Services

The network contains a single Active Directory forest named nothwindtraders.com. The forest contains five Remote Desktop servers. All Remote Desktop servers are in an organizational unit (OU) named RD Servers.

TECHNICAL REQUIREMENTS

Nothwind Traders must meet the following technical requirements:

- Minimize server downtime.
- Ensure that you can recover all of the data hosted on the VMs.
- Ensure that you can perform bare metal restores of the Hyper-V servers.
- Minimize the number of times a server restarts when it is deployed.
- Monitor the CPU utilization, memory utilization, and disk utilization of all the servers to analyze performance trends.
- Ensure that a specific set of Group Policy settings are applied to users who use Remote Desktop to connect to the Remote Desktop servers. The settings must differ from those applied when the users log on locally to their own computers.
- Copy a custom Microsoft Office Word dictionary to the computers in the legal department. Update the custom dictionary on a regular basis. Copy the updated version of the dictionary as soon as possible to the legal department computers.

QUESTION 183 You need to recommend a strategy to ensure that the administration of AD LDS is encrypted. What should you include in the recommendation? A. a server authentication certificate B. client authentication certificates C. Digest authentication D. Windows Integrated authentication Answer: A Testlet: Nothwind Traders

QUESTION 184 You need to recommend a solution for monitoring the servers. The solution must meet the company's technical requirements. What should you include in the recommendation? A. Data Collector Sets (DCSs) B. event subscriptions C. Reliability Monitor D. Windows System Resource Manager (WSRM) Answer: A Testlet: Nothwind Traders

QUESTION 185 You need to recommend a solution for improving the automated deployment of servers. The solution must meet the company's technical requirements. What should you include in the recommendation? A. an offline domain join B. native-boot virtual hard disks (VHDs) C. the Offline servicing of images D. the Online servicing of images Answer: A Testlet: Nothwind Traders

QUESTION 186 You need to recommend a Group Policy strategy for the Remote Desktop servers. What should you include in the recommendation? A. block inheritance B. loopback processing C. security filtering D. WMI filtering Answer: B Testlet: Nothwind Traders

QUESTION 187 You need to recommend a solution for deploying the custom Word dictionary. What should you include in the recommendation? A. Distributed File System (DFS) B. Group Policy preferences C. Offline servicing D. WDS Answer: B Testlet: Nothwind Traders

QUESTION 188 You need to recommend a backup strategy for HyperV. What should you recommend? A. Take a snapshot of each VM, and then run a full backup of the HyperV hosts by using Windows Server Backup. B. Shut down the VMs, and then run a full backup of the HyperV hosts by using Windows Server Backup. Restart the VMs when the backup is complete. C. From each VM, run a full backup by using Windows Server Backup, and then run a full backup of the HyperV hosts by using Windows Server Backup. D. From each VM, run a full backup by using Windows Server Backup. Shut down the VMs, and then run a full backup of the HyperV hosts by using Windows Server Backup. Restart the VMs when the backup is complete. Answer: C Testlet: Wingtip Toys

Wingtip Toys (exhibit):

www.passleader.com

Scenario

COMPANY OVERVIEW

Wingtip Toys is an international company that has a main office and several branch offices. The main office is located in Moscow. The branch offices are located throughout Europe. The main office has 500 users. Each branch office has 4 to 70 users.

PLANNED CHANGES

Wingtip Toys opens a new branch office that contains a file server. You plan to promote the file server to a Read-only Domain Controller (RODC).

Wingtip Toys plans to hire a consulting firm to manage its Web site. The consulting firm must only be permitted to manage the Web site and must be prevented from accessing to all other server resources.

Wingtip Toys plans to purchase a high-resolution printer that will be connected to a print server in the main office. Users must be charged for each page that they print on the printer.

You plan to present additional storage to a two node failover cluster in the main office. The storage will be used by the file server instance.

EXISTING ENVIRONMENT

All servers run either Windows Server 2008 or Windows Server 2008 R2. All client computers run either Windows Vista Enterprise or Windows 7 Enterprise.

Existing Network Infrastructure

The network contains an internal network and a perimeter network.

The company Web site is hosted on a standalone server in the perimeter network.

The main office connects to each branch office by using a 1-Mbps WAN link.

Existing Active Directory Environment

The network contains a single Active Directory domain named wingtiptoys.com. An Active Directory site exists for each office. Each Active Directory site contains a single subnet.

The main office has two domain controllers. Each branch office has a single domain controller.

Wingtip2 (exhibit):

REQUIREMENTS

Technical Requirements

Wingtip Toys must meet the following technical requirements:

- Minimize network utilization.
- Minimize WAN link utilization.
- Ensure that the file servers can access additional storage as a local drive.
- Ensure that changes to the network are transparent to users whenever possible.
- Ensure that new storage solutions are supported by Windows Failover Clustering.
- Ensure that each user can access his Documents folder from any client computer.
- Automatically organize the files on the file servers according to the contents of the files.
- Ensure that storage can be provisioned without causing any downtime of the file servers.
- Ensure that the data on the file servers is protected by using Windows BitLocker Drive Encryption (BitLocker).

Problem Statements

All users store their documents and other data in the Documents folder on their respective client computers. The users report that when they log on to a computer that is not their own, their documents are unavailable.

www.passleader.com

QUESTION 189 You need to recommend a solution for storing user documents. What should you include in the recommendation?

A. folder redirection B. home folders C. mandatory user profiles D. roaming user profiles Answer: A Testlet: Wingtip Toys

QUESTION 190 You need to recommend a monitoring solution for the new printer. What should you include in the recommendation?

A. Data Collector Sets (DCSs) B. event subscriptions C. object access auditing D. Print Management filters

Answer: C

<http://www.passleader.com/70-646.html> Testlet: Wingtip Toys QUESTION 191 You need to recommend a strategy for delegating administration to the consulting firm. What should you recommend?

A. Create local user accounts. B. Create domain user accounts. C. Create IIS Manager user accounts. D. Implement Active Directory Lightweight Directory Services (AD LDS).

Answer: C Testlet: Wingtip Toys QUESTION 192 You need to recommend a solution for promoting the RODC in the new branch office. What should you include in the recommendations?

A. Implement the Windows Search service and implement a custom iFilter. B. Implement File Server Resource Manager (FSRM) and configure file classifications. C. Implement Microsoft SharePoint Foundation 2010 and create a custom workflow. D. Implement a Distributed File System (DFS) namespace and configure folder targets.

Answer: B Testlet: Wingtip Toys QUESTION 193 You are evaluating whether to add an iSCSI target in the main office to add storage to the file servers. Which technical requirement cannot be met when using an iSCSI target?

A. Ensure that the data on the file servers is protected by using BitLocker. B. Ensure that the file servers can access additional storage as a local drive. C. Ensure that new storage solutions are supported by Windows Failover Clustering. D. Ensure that storage can be provisioned without causing any downtime of the file servers.

Answer: A Testlet: Wingtip Toys QUESTION 194 You need to recommend a solution for promoting the RODC in the new branch office. What should you include in the recommendation?

A. Active Directory snapshots B. an unattended answer file C. Install From Media (IFM) D. Answer ID D Answer: C Testlet:

School of Fine Art Sofa1 (exhibit): School of Fine Art

Scenario

COMPANY OVERVIEW

School of Fine Art is an educational institution that has a main campus and two satellite campuses. The main campus is located in New York. The satellite campuses are located in Los Angeles and Chicago. The main campus has approximately 4,000 users made up of students, faculty, and employees. Each satellite campus has approximately 1,000 users made up of students, faculty, and employees.

EXISTING ENVIRONMENT

The network contains a single Active Directory domain named `fineartschool.net`.

All servers run Windows Server 2008 R2. All client computers run either Windows XP or Windows 7.

The network contains Microsoft Application Virtualization (App-V) and Microsoft Enterprise Desktop Virtualization (MED-V).

Existing Network Infrastructure

The main campus has the following servers:

- A file server that contains confidential files
- A print server that has several printers installed
- A server that has the Windows Server Update Services (WSUS) server role installed

All client computers are updated by using the WSUS server.

The main campus has a computer lab. The lab has 50 client computers that run Windows 7 Enterprise.

The computer accounts for the lab computers are located in an organizational unit (OU) named `LabOU`. The user accounts and computer accounts for all of the students are located in an OU named `StudentsOU`. Both OUs are child objects in the `fineartschool.net` domain.

The relevant Group Policy objects (GPOs) are configured as shown in the following table.

GPO name	Linked to
GPO1	<code>fineartschool.net</code> domain
GPO2	<code>LabOU</code>
GPO3	<code>StudentsOU</code>

www.passleader.com

Sofa2 (exhibit):

REQUIREMENTS

Technical Requirements

The computer lab must meet the following requirements:

- Ensure that the user settings in all domain-level GPOs are applied to each student.
- Prevent the settings in all domain-level GPOs from being applied to the client computers in the computer lab.

The update management infrastructure must meet the following requirements:

- Each campus must control the updates for its respective campus.
- Update status reports must be sent weekly to the Enterprise Administrator on the main campus.

Application Requirements

All client computers will be upgraded to Windows 7 Enterprise.

An application named App1 runs on every client computer. App1 is only compatible with Windows XP. App1 must remain available after all of the operating system upgrades are complete.

App1 must meet the following requirements:

- App1 must be available from the Start menu.
- The management of App1 must be centralized.
- Each user must have a unique instance of App1.

Security Requirements

Security for the file server on the main campus must meet the following requirements:

- Unauthorized users must be prevented from printing sensitive files stored on the server.
- The contents of the server's hard disks must remain secure if the physical security of the server is compromised.

Problem Statements

Users report that they receive a different desktop environment every time they log on to a client computer in the computer lab.

The print server on the main campus has reliability issues. A malfunction on a single printer often causes other printers to malfunction.

www.passleader.com

QUESTION 195 You need to increase the reliability of the print server on the main campus. What should you do? A. Create printer pools. B. Configure printer redirection. C. Configure printer driver isolation. D. Change the location of the Spool folder.

Answer: C Testlet: School of Fine Art QUESTION 196 You need to recommend an update management strategy for the Chicago campus that meets the company's technical requirements. What should you recommend? A. Deploy a WSUS server in replica mode, and then configure the server's reporting rollup settings. B. Deploy a WSUS server in replica mode, and then configure the server's email notification settings. C. Deploy a WSUS server in autonomous mode, and then configure the server's reporting rollup settings. D. Deploy a WSUS server in autonomous mode, and then configure the server's email notification settings. Answer: D

Testlet: School of Fine Art QUESTION 197 You need to recommend a strategy for the computer lab that meet the company's technical requirements. What should you recommend? A. Enable the loopback setting in GPO2. Enable the Enforced option in GPO1. B. Enable the Block Inheritance option on Lab OU. Enable the Enforced option in GPO1. C. Enable the loopback setting in GPO2. Disable the user configuration settings in GPO3. D. Enable the Block Inheritance option on Lab OU. Disable the user configuration settings in GPO3. Answer: D Testlet: School of Fine Art QUESTION 198 You need to recommend changes to the file server on the main campus that meet the company's technical requirements. What should you include in the recommendation? A. Encrypting File System (EFS) B. NTFS permissions C. Syskey D. Windows BitLocker Drive Encryption (BitLocker) Answer: D

Testlet: School of Fine Art QUESTION 199 You need to recommend changes to the existing environment that meet the company's security requirements for the file server on the main campus. What should you recommend? A. Deploy Network Policy Server (NPS) and create a network policy. B. Deploy Print and Document Services and create a custom printer filter. C. Deploy File Server Resource Manager (FSRM) and create a file classification rule. D. Deploy Active Directory Rights Management Services (AD RMS) and create an AD RMS rights policy template. Answer: D Testlet: School of Fine Art QUESTION 200 You need to recommend a solution that meets the company's application compatibility and provisioning requirements. What should you recommend? A. Create a MED-V workspace. B. Publish a RemoteApp program. C. Package an application by using the App-V Sequencer. D. Create an application compatibility shim by using the Application Compatibility Toolkit (ACT). Answer: A

<http://www.passleader.com/70-646.html>
