You need to ensure that users can dial telephone numbers by using either the Skype for Business app for Windows or the Skype for Business mobile app. What should you do? A. Run the Windows PowerShell cmdlet Set-CsOnlineVoiceUser.B. In the Office 365 Admin center, enable Skype for Business PSTN Conferencing.C. In the Office 365 Admin center, enable Skype Meeting Broadcast.D. In the Office 365 Admin center, enable Skype Cloud PBX. Answer: DExplanation:Phone System in Office 365 (Cloud PBX) is Microsoft's technology for enabling call control and PBX capabilities in the Office 365 cloud with Skype for Business Online. Phone System allows you to replace your existing PBX system with a set of features delivered from Office 365 and tightly integrated into the company's cloud productivity experience. To enable calls to landlines and mobile phones, Phone System can be connected to the PSTN in one of two ways:? By purchasing Calling Plan?the PSTN calling plan add-on to Office 365.? By using on-premises PSTN connectivity, where software on-premises connects with your existing telephony infrastructure. https://docs.microsoft.com/en-us/skypeforbusiness/skype-for-business-hybrid-solutions/plan-your-phone-system-cloud-pbx-solution/plan-your-phone-system-cloud-pbx-solution NEW QUESTION 265You are a desktop administrator for a company. All desktops have Office 365 ProPlus installed. You need to enable telemetry and configure Office 365 ProPlus telemetry agent settings by using Group Policy. What should you do? A. Create custom reports.B. Configure the Telemetry Processor server.C. Configure the applications to include.D. Turn on privacy settings in the Telemetry Agent. Answer: BExplanation:Office Telemetry consist of the followings 5 components:? A simple network shared folder? Telemetry Processor? Telemetry database? Telemetry Dashboard? Telemetry AgentThe first 4 components are considered Server-side, while the Telemetry Agent is the client-side. To enable and configure the telemetry agent, you can edit the registry on each monitored client computer in small or test environments. For production environments that contain hundreds or thousands of client computers, you can use Group Policy administrative templates.https://www.systemcenterdudes.com/how-to-setup-telemetry-dashboard-for-office-2016/ NEW QUESTION 266You are an Office 365 administrator. You need to share a document with a colleague at another organization. The solution must meet the following requirements:? Share only required information.? Prevent anonymous access.? Allow multiple editors to work on the document simultaneously.What should you do? A. Send the external user a guest link to the document in a Microsoft SharePoint Online document library.B. Send the external user a guest link to the document in a Microsoft OneDrive for Business instance.C. Share the document by inviting the external user to sign in to your site by using a Microsoft account or a work or school account.D. Share an entire site by inviting the external user to sign in to your site by using a Microsoft account or a work or school account. Answer: CExplanation:Content can be shared with authenticated external users, meaning guest users are sent an invitation by email and prompted to sign in using an account from a trusted provider in order to access the content in question. Once the invitation is accepted, they are added to your organization's directory as an external user, but will only have access to the specific elements you shared with them. If you've shared an entire site, they'll have access to everything in it, so make sure it doesn't contain sensitive content.https://en.share-gate.com/blog/ultimate-guide-deal-with-office-365-external-sharing NEW QUESTION 267You are the Office 365 administrator for a company. All employees in the legal department are members of a security group named Legal-Discovery. You identify the following requirements:? Each member of the Legal-Discovery group must only be able to manage eDiscovery cases they create.? You must use the principle of least amount privilege when granting permissions.? Assign permissions using a default role or role group if one exists.You need to configure the Legal-Discovery group. What should you do? A. Create a custom role group. Add users to the role group.B. Add users to the eDiscovery Manager role group.C. Add users to the Compliance Administrator role group.D. Add users to the eDiscovery Administrator role group. Answer: BExplanation: eDiscovery Managers An eDiscovery Manager can use the Content Search tool in the Security & Compliance Center to search content locations in the organization, and perform various search-related actions such as preview and export search results. Members can also create and manage eDiscovery cases, add and remove members to a case, create case holds, and run Content Searches associated with a case. An eDiscovery Managers can only access and manage the cases they create. They can't access or manage

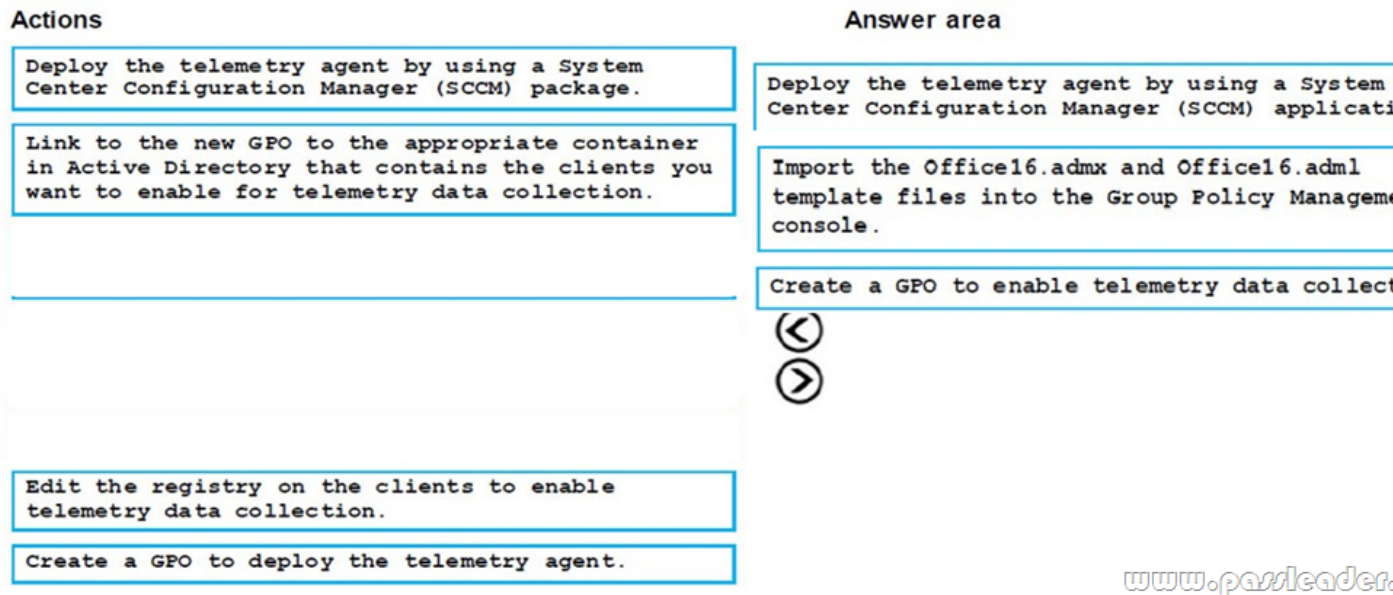

cases create by other eDiscovery Managers.
https://support.office.com/en-us/article/assign-ediscovery-permissions-in-the-office-365-security-compliance-center-5b9a067b-9d2e-4aa5-bb33-99d8c0d0b5d7 NEW QUESTION 268You are the Office 365 administrator for a company. You license Microsoft Teams for most employees. Other employees only have licenses for Microsoft Skype for Business Online. Employees that use Teams must be able to contact other employees by using Skype for Business Online. You need to configure Office 365. Where should you configure the settings? A. Calls and MeetingsB. AppsC. GeneralD. Messaging Answer: CExplanation: Interoperability only supports basic chat and calling between Skype for Business and Teams. Configure general settings for one user:1. You must have admin permissions to perform these steps.2. Sign in to Office 365 with your work or school account.3. Choose Admin centers > Skype for Business.4. Choose Users.5. Choose which users you want to edit.6. In the right panel, choose Edit.7. On the General options page, select or clear the check box next to the features you want to change, and then choose Save.

https://docs.microsoft.com/en-us/skypeforbusiness/set-up-skype-for-business-online/configure-skype-for-business-settings-for-individual-users NEW QUESTION 269You are the Office 365 administrator for your company. The company uses Microsoft Skype for Business Online and wants to customize Skype for Business meeting invitations. You need to identify the URLs that may not be changed on the Skype for Business meeting invitations from the Skype for Business admin center. Which two URLs may NOT be changed? (Each correct answer presents part of the solution. Choose two.) A. Legal URLB. Logo URLC. Help URLD. Company URLE. Meeting URL Answer: DEExplanation:Customize Action are available only for Logo ,Help, Legal and Footer.
https://technet.microsoft.com/en-us/library/gg398638(v=ocs.15).aspx NEW QUESTION 270Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.You are the Office 365 administrator for a company. All employees use Office 365 authentication, email, and Office applications. You need to implement a process to review email, Facebook posts, and files saved to Dropbox.Solution: You implement a supervision policy. Does the solution meet the goal? A. YesB. No Answer: BExplanation:
https://support.office.com/en-us/article/configure-supervision-policies-for-your-organization-d14ae7c3-fcb0-4a03-967b-cbed861bb086 NEW QUESTION 271You are the Office 365 administrator for a company. Users from a business partner sign in to Office 365 to access the company's resources. Employees must be able to share documents in a specific site collection with users from the business partner. Employees must not be able to share documents in the site collection with other users. You need to configure sharing. What should you do? A. Configure the Allow external users who accept sharing invitations and sign in as authenticated users option for the site collection.B. Configure the Allow sharing with all external users, and by using anonymous access links option for the site collection.C. Configure the Allow sharing only with the external users that already exists in your organization's directory option for the site collection.D. Configure the Allow sharing only with the external users that already exist in your organization's directory option for the tenant. Answer: CExplanation:
https://support.office.com/en-us/article/securing-a-sharepoint-online-extranet-site-c5384693-53ab-4f6f-99a2-59e74185d87f NEW QUESTION 272You administer Office 365 tenant for an organization. You assign Enterprise E5 licenses to all users. You need to create a Microsoft Excel workbook and save the file on a local file share. You need to create a Microsoft PowerApp that uses the Excel workbook as its data source. What should you do? A. Convert the Excel workbook to a CSV file.B. Migrate the Excel workbook to an XML file in a cloud storage account.C. Migrate the Excel workbook to a CSV file in a cloud storage account.D. Copy the Excel workbook to a cloud storage account. Answer: DExplanation:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/connections/cloud-storage-blob-connections NEW QUESTION 273 You are the Office 365 administrator for a company. All accounts include the user's city, office, department, manager, and job title. Users must be able to view all user accounts from a specific department in a single list. The list must not be used to send email to the department. You need to configure Office 365. What should you do? A. In the Microsoft Exchange admin center, create a public Office 365 group.B. In the Microsoft Exchange admin center, create a shared mailbox.C. Connect to Microsoft Exchange Online by using Windows PowerShell and create an address list.D. In the Microsoft Exchange admin center, create a private Office 365 group. Answer: CExplanation:https://technet.microsoft.com/en-us/library/bb125036(v=exchg.150).aspx NEW QUESTION 274You are the desktop administrator for a company. All desktops have Office 365 ProPlus installed. You need to ensure that the user can see data in the Telemetry Dashboard. What should you do? A. Add the user to the local Administrators group on the telemetry Dashboard server.B. Instruct the user to authenticate to the Microsoft SQL Server by using SQL Server authentication credentials. C. Instruct the user to authenticate to the Microsoft SQL Server by using Windows authentication.D. Add the user to the Domain

Admins group. Answer: AExplanation:https://docs.microsoft.com/en-us/deployoffice/compat/deploy-telemetry-dashboard NEW QUESTION 275You administer the Office 365 tenant for an organization. You assign Enterprise E5 licenses to all users. You observe that users share files from Microsoft OneDrive for Business storage in violation of organization policy. You need to ensure that you receive alerts when users share anything from their OneDrive for Business storage. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.) A. Create a new alert policy with a custom alert for a Sway activity.B. Create a new alert policy with a custom alert for an access request activity.C. Create a new alert policy with a custom alert for the shared file folder or site activity.D. Create a new alert policy with an elevation of privilege alert.E. Start recording user and admin activities in the Alerts node of the Security&Compliance Center.F. Create as alert in the OneDrive for Business client app. Answer: CEExplanation:
https://www.c-sharpcorner.com/article/alert-policies-in-the-office-365-security-compliance-center/ NEW QUESTION 276?? NEW QUESTION 292**Drag and Drop**You are an administrator for a company. All clients run Office Professional 2016 or Office 365 ProPlus. Your organization uses System Center Configuration Manager 2012 R2 for deploying software to desktops. You must enable automated Office telemetry data collection. You need to enable Office telemetry without manually connecting to and configuring each machine. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

**Actions**

- Deploy the telemetry agent by using a System Center Configuration Manager (SCCM) package.
- Link to the new GPO to the appropriate container in Active Directory that contains the clients you want to enable for telemetry data collection.
- Deploy the telemetry agent by using a System Center Configuration Manager (SCCM) application.
- Import the Office16.admx and Office16.adml template files into the Group Policy Management console.
- Create a GPO to enable telemetry data collection.
- Edit the registry on the clients to enable telemetry data collection.
- Create a GPO to deploy the telemetry agent.

Answer:

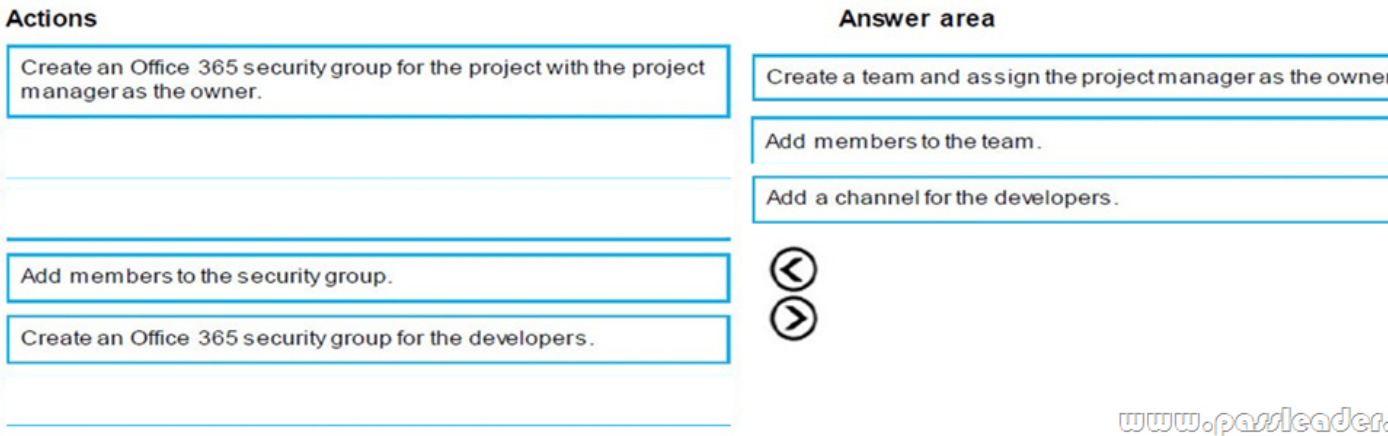

Explanation:After the Telemetry Agent is deployed to the client computers, you must configure the agent on each client by setting

the correct registry values. If you have Active Directory, we recommend that you use Group Policy to enable and configure Telemetry Agent.Box 1:Use these steps of Telemetry Agent deployment by using Configuration Manager:1. Create an application for the Telemetry Agent by using Configuration Manager2. Deploy the application by using Configuration Manager3. Configure the Telemetry AgentBox 2-3:Once the server side is configured, it's time to enable and direct the Telemetry toward our Telemetry Processors. We need to configure a GPO for Office 2013 or Office 2016 in order to do so. Edit a GPO and browse to User Configuration/Administrative Templates/Microsoft Office 2016/Telemetry Dashboard:1. Edit Specify the UNC path to store Office Telemetry data Edit Turn on telemetry data collection. Set to Enabled.2. Edit Turn on data uploading for Office Telemetry Agent. Set to Enabled.https://www.systemcenterdudes.com/how-to-setup-telemetry-dashboard-for-office-2016/ NEW QUESTION 293 **Drag and Drop**You administer the Office 365 tenant for an organization. You assign Enterprise E5 licenses to all users. You must deploy a collaboration solution for developers that meet the following requirements:? Members of the developers team must be able to collaborate separately as a team.? The project manager must be able to change team membership without the need for administrative intervention.You need to enable the required components in Office 365 to provide the collaboration environment. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.)

Answer:

Explanation:Within Microsoft Teams there are two roles: Owner and Member. By default, a user that creates a new team is granted the Owner status. If a team is created from an existing Office 365 Group, permissions are inherited. Channels are dedicated sections within a team to keep conversations organized by specific topics, projects, disciplines?? https://docs.microsoft.com/en-us/microsoftteams/teams-channels-overview NEW QUESTION 294**Hotspot**You administer the Office 365 tenant for an organization with Enterprise E5 licenses assigned to all users. You need to configure Microsoft Teams to meet the following requirements:? Ensure that the project manager can manage team membership and channel creation.? Prevent other users from performing these activities.What should you do? (To answer, select the appropriate action for each requirement in the answer area.)

**Answer Area**

| Requirement | Action |
|---|---|
| Membership management | project manager as owner with the privacy setting Private<br>project manager as owner with the privacy setting Public<br>project manager as member with the privacy setting Private<br>project manager as member with the privacy setting Public |
| Channel creation | Configure settings for the team<br>Edit the team<br>Configure the team using the Channels tab<br>Edit members of the team |

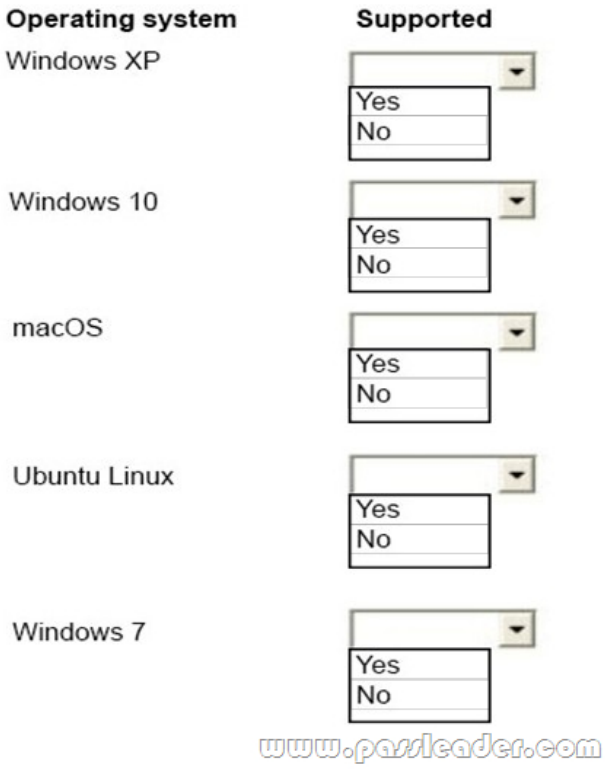

www.passleader.com

Answer: **Answer Area**

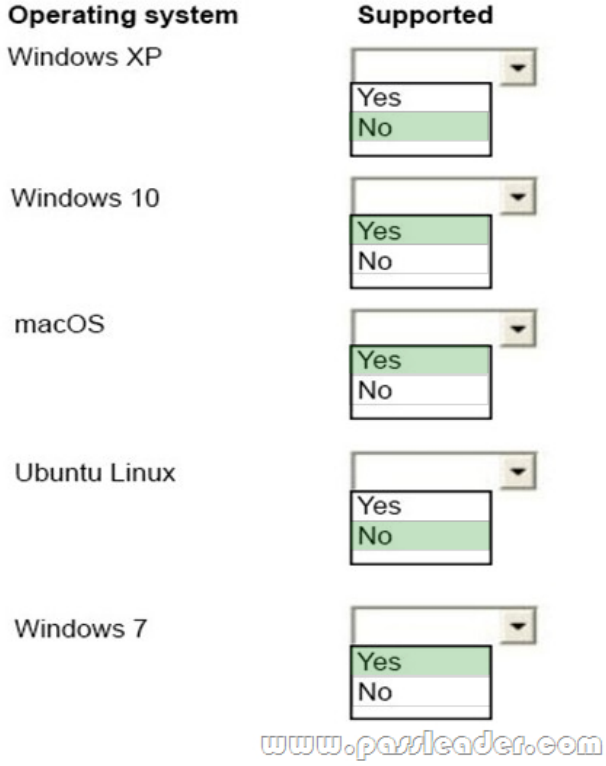

| Requirement | Action |
|---|---|
| Membership management | project manager as owner with the privacy setting Private<br>project manager as owner with the privacy setting Public<br>project manager as member with the privacy setting Private<br>project manager as member with the privacy setting Public |
| Channel creation | Configure settings for the team<br>Edit the team<br>Configure the team using the Channels tab<br>Edit members of the team |

www.passleader.com

Explanation:Private means that membership requires approval by a site owner, and only members can view the content. Channel creation can be turned off by an owner at a team level, in which case members would not have access to that.Incorrect:Public: Public means everyone in your organization can see the content and become a member.
https://docs.microsoft.com/en-us/microsoftteams/assign-roles-permissions NEW QUESTION 295**Hotspot**You are the Office 365 administrator for a company. You need to determine the operating systems on which you can install the Microsoft OneDrive sync client. Which operation systems support the OneDrive sync client? (To answer, select the appropriate options in the answer area.)

Answer:

Explanation:
https://support.office.com/en-us/article/deploy-the-new-onedrive-sync-client-for-windows-3f3a511c-30c6-404a-98bf-76f95c519668
